

SRIRAM K

AI & Data Science Graduate • Java Developer • Automation Testing Enthusiast

+91-6381-102-874 | titooram123@gmail.com | linkedin.com/in/sriram-k-486bb4343 | github.com/sriram-Kannan-45

CORE SKILLS

Languages

Java, Python, C, SQL

AI / ML Frameworks

TensorFlow, PyTorch, Scikit-learn

Libraries

NumPy, Pandas, OpenCV, NLTK, gTTS

Automation Testing

Selenium WebDriver, Playwright with AI MCP, TestNG, PyTest, REST Assured, Insomnia

DevOps & Tools

Git, GitHub, Jenkins, Maven

Concepts

OOP, Agile, SDLC, REST APIs, CI/CD, ISTQB Fundamentals

AREAS OF INTEREST

- Automation Testing & CI/CD
- Computer Vision
- Deep Learning

EDUCATION

B.Tech — AI & Data Science

Knowledge Institution of Technology

2022 – 2026

HSC (Class XII) — 88.8%

Little Flower Higher Secondary School

2021 – 2022

SSLC (Class X) — 86.6%

Govt. High School, Chettichavadi

2019 – 2020

PROFESSIONAL SUMMARY

Results-driven AI & Data Science graduate with hands-on experience in deep learning, computer vision, and Java-based application development, combined with strong, practical exposure to automation testing across Java, Python, and Playwright ecosystems. Skilled in building end-to-end test automation frameworks with Selenium, Playwright, TestNG, and PyTest, and integrating them into Jenkins-driven CI/CD pipelines for reliable, repeatable software delivery. Proven ability to design and deploy scalable AI solutions alongside robust, maintainable automation suites. Seeking a role where AI engineering strengths and a quality-first automation testing mindset can drive high-impact, testable software delivery.

AI & MACHINE LEARNING PROJECTS

Bone Fracture Detection System | [Deep Learning](#) · [Computer Vision](#) · [YOLO](#)

- Designed an AI-powered bone fracture detection system using YOLO for fast, high-precision analysis of X-ray and medical images.
- Implemented deep learning pipelines with TensorFlow and OpenCV, enabling real-time diagnostic inference with clinical-grade precision.
- Integrated image preprocessing and data augmentation to improve model generalization across diverse medical imaging datasets.
- Built a scalable, modular architecture suitable for clinical diagnostic deployment, significantly reducing manual analysis time.

Medicam — AI Medicine Recognition System | [OpenCV](#) · [NLP](#) · [gTTS](#) · [Accessibility](#)

- Developed an AI-based medicine recognition application using OpenCV for real-time image classification of medicines from camera input.
- Implemented multilingual Text-to-Speech (TTS) using gTTS, delivering usage instructions in Tamil and English to promote accessibility.
- Integrated NLTK-based NLP to parse and deliver structured medicine usage details, reducing misuse through guided auditory communication.
- Designed a user-first, audio-driven interface supporting users with low literacy or visual impairments through a minimal-click experience.

AUTOMATION TESTING PROJECTS

Training Feedback System | [Java Console Application](#) · [JDBC](#) · [OOP](#)

- Designed and developed a console-based Training Feedback Management System in Core Java to digitize feedback collection for corporate training sessions.
- Applied OOP principles — encapsulation, inheritance, and polymorphism — to build modular, maintainable feedback-processing logic.
- Integrated JDBC connectivity with a relational database to persist trainee feedback, ratings, and session data for structured reporting.

CERTIFICATIONS

- Machine Learning Certificate — TechVolt Pvt. Limited
- Deep Learning Certificate — Evointoo
- ISTQB (CTFL-153711)

SOFT SKILLS

- Analytical Problem-Solving
- Attention to Detail
- Team Collaboration
- Time Management
- Adaptability

LANGUAGES KNOWN

English, Tamil

Cyclos — End-to-End Test Automation | [Java](#) [Selenium](#) · [TestNG](#) · [Jenkins](#)

- ▶ Automated end-to-end functional test scenarios for the Cyclos digital banking platform using Selenium WebDriver with Java.
- ▶ Designed a Page Object Model (POM) framework integrated with TestNG for structured, reusable, and maintainable test scripts.
- ▶ Implemented data-driven testing to validate multiple account and transaction scenarios, reducing manual regression effort.
- ▶ Configured Jenkins CI/CD pipelines with GitHub to trigger automated regression suites on every code commit, with HTML test-execution reports for tracking pass/fail trends.

OrangeHRM — Web Application Test Automation | [Python](#) [Selenium](#) · [PyTest](#) · [Jenkins](#)

- ▶ Built an automated test suite for the OrangeHRM web application using Python and Selenium WebDriver to validate core HR workflows including login, employee records, and leave management.
- ▶ Adopted the Page Object Model design pattern with PyTest for a scalable, readable, and easily maintainable test architecture.
- ▶ Implemented data-driven test cases and assertions to validate UI behavior against expected backend responses.
- ▶ Integrated the automated suite with Jenkins for continuous execution, failure tracking, and automated bug reporting.

SmartCliff LMS Portal — UI Test Automation | [Playwright](#) · [CI/CD](#)

- ▶ Automated cross-browser end-to-end testing of the SmartCliff Learning Management System (LMS) portal using Playwright.
- ▶ Designed reusable, resilient test scripts covering login, course enrollment, and assessment workflows.
- ▶ Leveraged Playwright's auto-wait and network-interception capabilities to minimize test flakiness and improve execution reliability.
- ▶ Integrated automated test execution into a Jenkins CI/CD pipeline for continuous quality feedback on every build.

OrangeHRM — Performance Testing | [Playwright](#) · [CI/CD](#)

- ▶ Conducted performance and load testing of the OrangeHRM web application using Apache JMeter.
- ▶ Designed and executed test plans covering key workflows such as user login, employee management, leave management, and dashboard operations.
- ▶ Simulated multiple concurrent users to evaluate application performance, scalability, and system stability under different load conditions.

INTERNSHIP EXPERIENCE

Deep Learning Intern — Evointoo

Feb 2025 – Present

- ▶ Developing and fine-tuning deep neural network architectures using TensorFlow and PyTorch for image recognition and pattern classification.
- ▶ Implementing computer vision pipelines and contributing to model training, evaluation, and iterative performance analysis.

Machine Learning Intern — TechVolt Pvt. Limited

Jul 2024 – Oct 2024

- ▶ Executed end-to-end ML model development including data preprocessing, feature engineering, and algorithm implementation using Python and Scikit-learn.
- ▶ Applied regression and classification algorithms to solve real-world business problems with measurable accuracy benchmarks.

DECLARATION

I hereby declare that the details furnished above are true and correct to the best of my knowledge and belief. I take full responsibility for the authenticity of the information provided.
